Arome

Product Designer & Presentation Specialist

I transform complex ideas into compelling visual stories that drive decisions and inspire action.

Let's Connect

Helping teams and leaders tell their story through thoughtful design, strategic visuals, and seamless presentations. Whether you need a design overhaul, a killer pitch deck, or help visualizing data — I'm here to make it unforgettable.

Core Competencies

Visual Design

Creating elegant, intuitive interfaces that feel effortless.

Storytelling

Weaving narratives that resonate and persuade audiences.

Data Visualization

Making numbers meaningful and insights crystal clear.

Public Speaking

Delivering presentations with confidence and authenticity.

Gamma Mastery

Building responsive, interactive presentations that stand out.

Featured Project: SaaS Platform Redesign

The Challenge

An enterprise SaaS platform suffered from poor user adoption and high churn. The interface was cluttered, onboarding took 45 minutes, and users couldn't find key features.

The Solution

Led a complete visual redesign, streamlined information architecture, and created an intuitive onboarding flow. Conducted user research, built prototypes, and iterated based on feedback.

The Impact

38% increase in conversions, onboarding time reduced to 12 minutes, and customer satisfaction scores jumped 22 points.

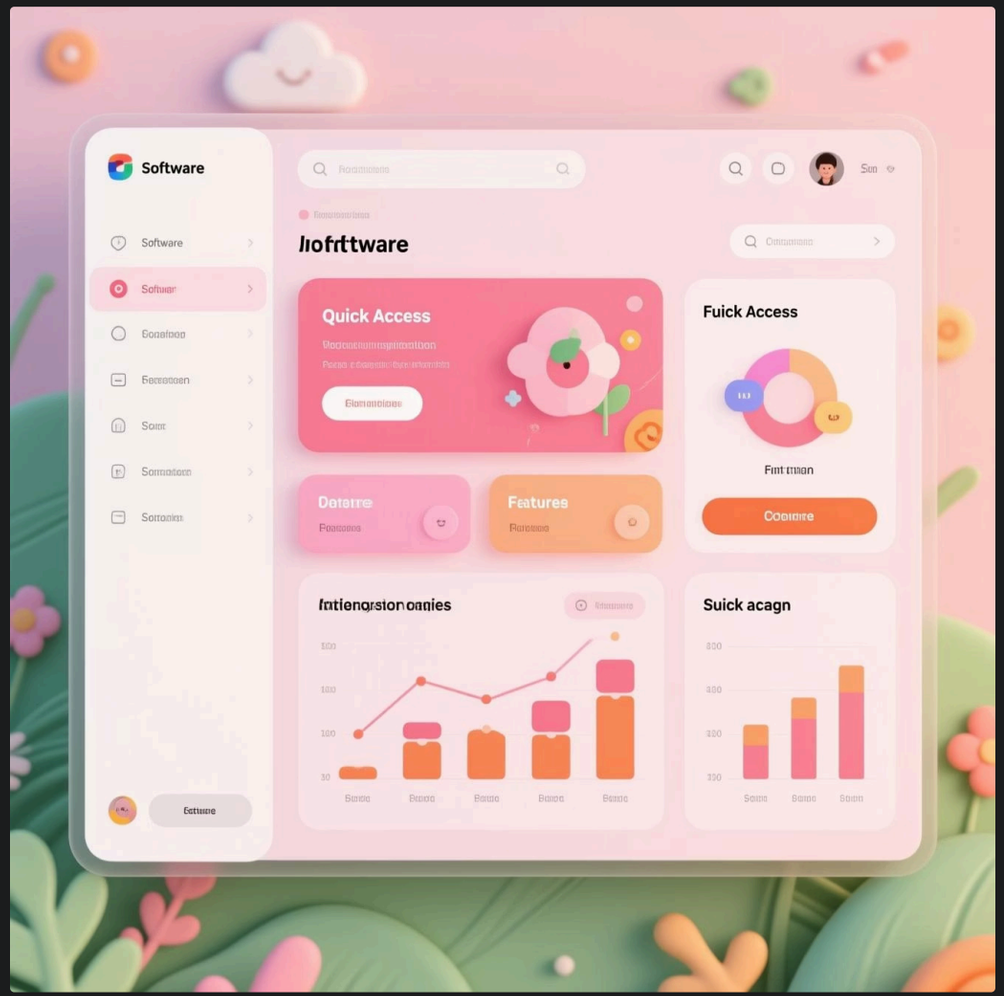

Redesign Results

Before Redesign

Dense interface overwhelmed users. Hidden features buried in menus. Navigation unclear.

After Redesign

Streamlined flow. Prominent CTAs. Quick access to top features. Delightful experience.

Featured Project: Executive Presentation Strategy

Project: Board-Level Investor Pitch

Result: $12M Series B funding secured. Designed a 15-slide deck that balanced strategic vision with concrete metrics, helping leadership tell a compelling growth story that resonated with investors.

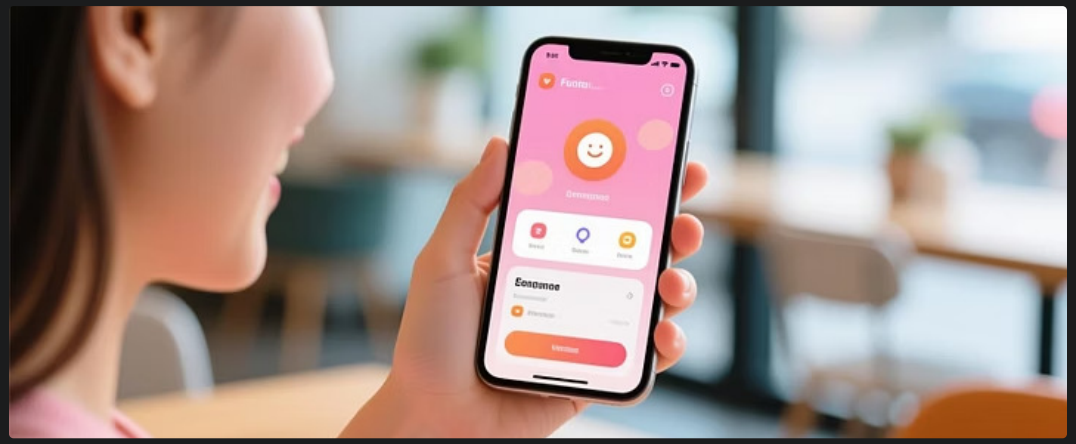

Project: Annual Report Design

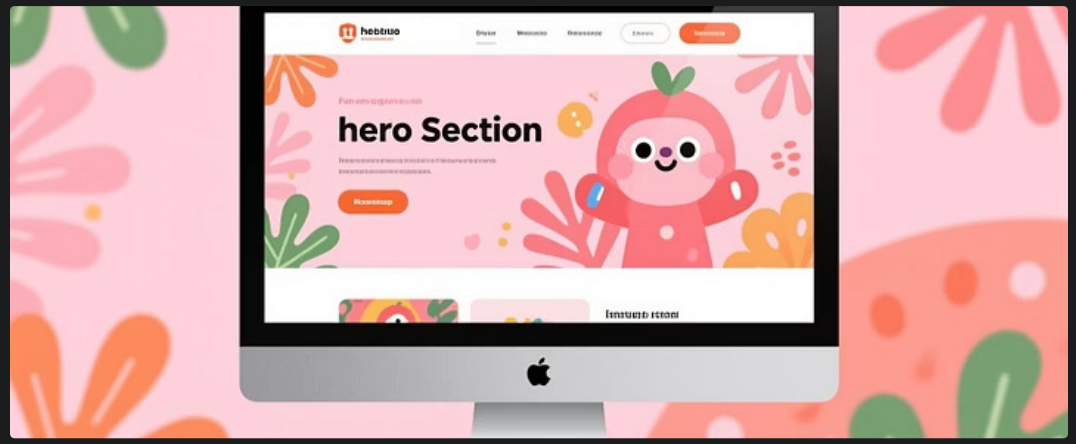

Result: 45% increase in stakeholder engagement. Transformed dense financial data into visual narratives, making complex performance metrics accessible and memorable for 500+ company leaders.

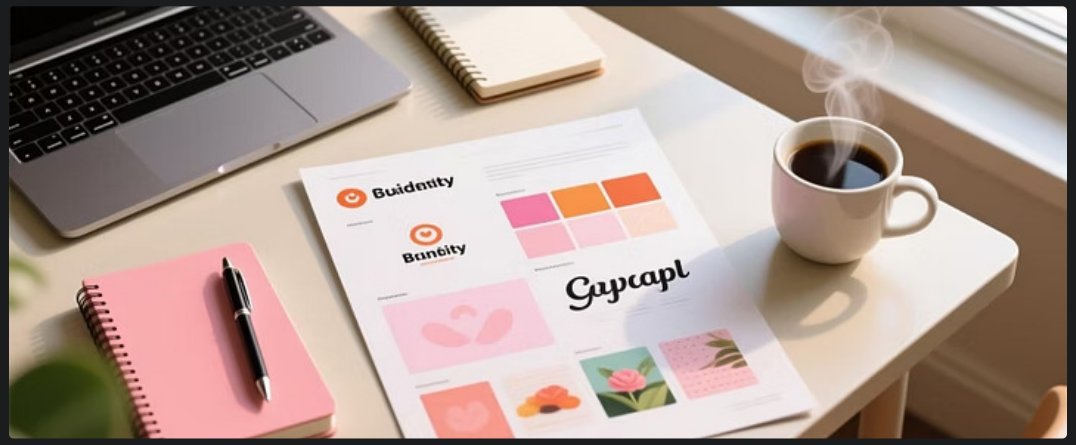

Project: Sales Enablement Deck

Result: 28% boost in win rates. Created a modular presentation system that sales teams could customize, ensuring consistency while maintaining flexibility for different buyer personas.

My Process

Discover

I start with deep research—user interviews, competitive analysis, and problem definition. Understanding the real challenge is everything.

Design

Sketches become wireframes become high-fidelity designs. I iterate constantly, testing assumptions and refining based on feedback.

Validate

Prototypes go into users' hands. I observe, listen, and measure—making data-driven decisions to optimize for impact.

Deliver

The final product ships with documentation, guidelines, and support. Success means the solution outlives the project.

What Clients Say

"Alex took our scattered ideas and turned them into a presentation that got us across the finish line. The deck didn't just look great—it sold the vision."

— Sarah M., VP of Product, FinTech Startup

"Working with Alex was a game-changer. She understood our users better than we did and designed solutions that actually worked. Our satisfaction scores proved it."

— James L., CEO, Enterprise SaaS
